

MINERAL EXPLORATION MANAGEMENT

Table of Contents

1. Setting the Scene

- 1.1. Mineral Exploration and the Mining Industry
 - Exploration Track Record
 - Public Perception and Sustainable Development
 - Lean and Mean
- 1.2. Exploration Management
 - Management Skills
 - The Curse of Management
 - Key Challenges Facing the Exploration Manager
- 1.3. What Makes a Successful Explorer?
 - Corporate Management (including Boards of Directors)
 - Exploration Managers
 - Exploration Teams
 - Field Geologists (and Mine-Finders)
- 1.4. About This Book

2. The Management Challenge

- 2.1. Management Terms
 - Mission
 - Vision
 - Strategy and Tactics
 - Business Plans
- 2.2. A Simple Management Cycle
 - Policies
 - Goals
 - Planning
 - Implementation
 - Checks and Audits
 - Management Reviews
 - The Importance of Documentation
- 2.3. The Business of Management
 - Management vs Leadership
 - Accountability vs Responsibility
 - Decision Making
 - Delegation
 - Micromanagement
 - Management Discretion
 - Change Management
 - Quality Control – How Good is “Good Enough”?
- 2.4. Summary – Management

3. Business Development

3.1. Exploration Strategy

- The Search Space Concept
- Mining or Exploration Company?
- What is our Exploration Target?
- Where will we Operate?
- Exploration or Acquisition?
- Greenfields or Brownfield Exploration?
- 100% Ownership or Joint Venture?
- What Makes Us Different?
 - Make Direct Contact
 - Monitor the Press
 - Attend Conferences, Symposia and Society Meetings
 - Reconnaissance Field Trips
 - Appoint a Local Agent
 - Mining Industry Databases
 - MinesOnline

3.2. Identifying New Project Opportunities

- Competitor Intelligence
- Submittals from Third Parties
- What to Look for in a Potential New Project?

3.3. Creating New Projects

- Ore Deposit Models and Mineral Systems
 - Empirical Models
 - Genetic Models
 - Mineral System Model
 - Exploration Criteria for Mineral Systems
 - Exploration Criteria for Deposit Detection
- Regional Geology and Prospectivity Mapping
 - Collaborative Research
 - Data Sources
 - Data Preparation – Use an Expert
 - Data-Driven Analysis
 - Knowledge-Driven Analysis
 - Consultants and Databases

3.4. Due Diligence Studies

- What to Look for On-Site?
 - Evidence of Work Done
 - Quality of Work
 - Confirm All Measurements
 - Assess Competence
- In-Depth Investigations
 - Security of Tenure
 - Country Risk
- Due Diligence Reports

3.5. Project Valuation

- Income-Based Methods
 - DCF Models
 - Option Pricing

Cost-Based Methods
Market-Based Methods

3.6. Corporate Deals in Exploration

Investments

- Peg Your Own Mineral Licence
- Outright Purchase or Option to Purchase Property
- Farm-In JV
- Acquire Equity in a Junior Explorer (or Leveraged Fund)
- Grubstaking
- Strategic Alliance based on Research or Technology

Divestments

- Tribute Agreement
- Farm-Out JV
- Junior Alliance, with Claw-Back

Terms of the Deal

- Project Equity
- Expenditure Commitments
- Claw-Back Rights
- Project Management
- JV Entity

3.7. The Art of Negotiation

Pre-Negotiation Planning

- Content
- Process

The Formal Negotiation

- Communication in a Negotiation
- Breaking Deadlocks and Conflict Resolution

Post-Negotiation Review

Sealing the Deal

- The Final Agreement
- JV Partner Relationship
- Resolving Disputes
- Terminating the Agreement

3.8. Summary – Business Development

4. Discovery & Evaluation

4.1. Three Key Exploration Questions

Where to Explore?

- Areas of Interest (Aoi)
- Drill Target Definition

How to Explore?

When to Move On?

4.2. Exploration Management Tools and Concepts

The Exploration Portfolio

The Exploration Pipeline

- Setting Priorities

The Exploration Programme (a Business Plan)

Monitoring Exploration Progress

4.3. Drill Target Definition – Exploration Methods

Geology

- Geological Mapping – the Most Important Data Set?
- Drill Core/Chip Logging
- Petrographic Studies
- Hyperspectral Mineral Analysers
- Structural Geology
- Experts at Geological Surveys and Local Universities

Geochemistry

- The Analytical Laboratory
- Sample Preparation
- Generate the Best Geochemical Data Set you can Afford
- Geochemical Data QAQC
- Conduct Orientation Surveys
- Sample Integrity is Everything
- Use a Portable XRF
- Map the Regolith before Interpreting the Geochemistry
- Geochemical Data Processing, Analysis and Interpretation

Geophysics

- Be Clear about Survey Objectives
- Trust Your Geophysicist
- Petrophysical Properties
- Electrical Surveys: EM, IP and CSAMT
- Seismic
- Interpret Geophysical Data
- Modelling Targets Directly
- Downhole Geophysics

Remote Sensing

- Source Free Archived Imagery
- Select the Best Imagery Fit for Purpose
- Use a Specialist Consultant
- Image Processing Software

4.4. Drilling

Drill Programme Design

- Target Testing
- When to Declare a Discovery and When to Abandon a Target?
- Infill Drilling

The Management of Drilling

- It's All about the Samples
- The Drill Contract
- Pre-Drilling Meetings
- Who Does What?
- Monitoring Drilling Performance

The Future of Drilling

4.5. Mineral Resource Estimation

- Who is in Charge and Who Does the Work?
- Inputs from the Exploration Team

- Geochemical Assays
- Bulk Density Measurements
- Surveys of Topography and Drill Hole Collars
- The Geological Model – Explicit or Implicit?
- Domaining and Domain Boundaries
- Creating the Block Model
 - Which Interpolation Method is Best?
 - Validation
 - Classification
- Reporting the Results
 - International Reporting Codes
 - Competent Persons and Qualified Persons
 - Report Content (and Format)

4.6. Feasibility Studies

- A Multi-Disciplinary Team Effort
- Contributions from the Exploration Team
 - Metallurgical Sample Suite
 - Geotechnical Data
 - Hydrological and Hydrogeological Data
 - Licence to Operate Issues
- A Final Word on Feasibility

4.7. Summary – Discovery and Evaluation

5. Data and Information

5.1. The Samples Database

- A Relational Database and the Data Model
- Reporting the Data
- Electronic Data Capture
- Loading Historical Data
- Geophysical Data and Remote Sensing Imagery

5.2. Maps (the GIS Database)

- Making Maps
- The Value of GIS
- Managing Spatial Data Sets

5.3. Technical Reports

- Knowledge Management
- In-House Technical Reports
- Other Technical Documents
- Document Management
 - File Naming
 - Maps
 - E-Mail
 - Notes
- Electronic or Hardcopy?

5.4. Summary – Data Management

6. Human Resources (HR)

6.1. Organisational Structure

- Job Profiles
- Recruitment
 - Professional Staff
 - Non-Professional Staff
 - Casual Staff
- Succession Planning
- Staff Retention and Turnover

6.2. **Teamwork**

- Team Construction
- Team Management
- Virtual Teams and Remote Workers
- Meeting Your Team for the First Time
- Company Culture
- Diversity

6.3. **Employment Contracts**

- Full-Time, Fixed-Term or Casual?
- Pay Scale
- Retention Incentives
- Staff Rosters
- Ancillary Documents

6.4. **Performance Management**

- Annual Performance Reviews
 - Salary Increments
 - Performance Contracts
 - It Should be about the Conversation
 - Keep Rating Schemes Simple
- Dealing with Performance Issues
 - Motivation
 - Under-Performance
 - Discipline and Dismissals
- Group Performance and Grievances

6.5. **Staff Development and Training**

- Formal Training
 - In-House Workshops
 - E-Learning
 - Inductions
- Informal Training
 - Coaching (On-the-Job)
 - Mentoring
- Career Planning

6.6. **Summary – Human Resources**

7. Administration and Finance

7.1. **Corporate Governance**

- Corporate Policies
- Corporate Risk Management

- The Risk Register
- Identifying the Risks
- Assessing the Risks
- Risk Appetite
- Crisis Management
- Bribery and Corruption

7.2. **Serving the Market**

- Press Releases
- News Media Enquiries
- Investor Site Visits
- Marketing Material and Conferences

7.3. **Legal Matters and Legislation**

- Local Legislation
- Contracts
 - Confidentiality Agreements
 - JV Agreements
 - Letters of Intent
 - Engaging Consultants

7.4. **Budgets and Expenditure Control**

- Authorization and Expenditure Limits
- Budgets
- Expenditure Controls
- Financial Audits

7.5. **Tenement Administration**

7.6. **General Administration**

- Admin. Staff
- Management System Documentation
- Internal Management Reports
- Meetings
- Contacts Register and Corporate Calendar
- Personnel Records
- Closing Down

7.7. **Asset Management**

- The Asset Register
- The Office and other Fixed Properties
- Vehicles
- Field Equipment
- Insurance
- Security

7.8. **Logistics**

- Importing Equipment and Supplies
- Field Camps
- Communications Protocols
- Travel and Accommodation

7.9. **Summary – Admin. & Finance**

8. Our Licence to Operate

8.1. Health and Safety

- The Swiss Cheese Model and Safety Culture
- Hazard Identification and Risk Assessment (HIRA)
 - Control and Risk Mitigation
 - Safety Priorities in Mineral Exploration
- Promoting and Monitoring Awareness of H&S
 - Leaders Must Set an Example
 - H&S Employee Representatives and Committees
 - H&S Observation Cards and Job Hazard Analyses
 - Health and Safety Reporting
 - Rewarding Safety Performance
 - H&S meetings
 - Safety Announcements and Alerts
 - Inductions
 - Emergency Response Training
 - SOPs and Golden Rules
 - H&S Audits and Inspections
- Medical Emergency Response Plan
- Incident Investigations
 - Gathering Information
 - Interpreting the Facts
 - Follow-Up

8.2. Environment

- Environmental Principles and Objectives
- Culture and Attitude to the Environment
- The Environmental Approvals Process
 - Work Programmes
 - Mining Proposals
 - Environmental Reporting
 - Environmental Offsets
- Monitoring the Environment and Baseline Studies
 - Basic Environmental Measurements and a Photographic Record
 - When to Involve Environmental Experts
 - More Detailed Environmental Measurements
- Minimising Environmental Impacts
 - Explain Why It's So Important
 - The Most Common Breaches of Good Environmental Stewardship
 - More Environmental Initiatives
- Environmental Rehabilitation
- Environmental Audits and Inspections

8.3. Community Relations (ComRel)

- Why Does ComRel Matter?
 - Social Impacts
 - The Business Case
 - Why the Exploration Team?
- Standards and Guidelines
- Sticky ComRel Issues
 - Free and Prior Informed Consent
 - Vulnerable People
 - Artisanal and Small-Scale Mining (ASM)

- Community Engagement
 - Principles of Good Engagement
 - Stakeholder Mapping
 - Preparing to Engage
 - First Meeting Imperatives
 - Maintaining Momentum
 - Key Messages
 - Handling Grievances
- Security
- Socio-Economic Development (and Investment)
 - Local Community Support
 - Community Investment Projects
- ComRel Audits and Inspections

8.4. Summary – HSEC

9. What Do YOU Need to Do?

- 9.1. Set Goals
 - Clarify Priorities
 - Be Prepared for Change
- 9.2. Make the Tough Calls
- 9.3. Communicate with All Stakeholders - Frequently
 - Communication Skills
 - Ask Lots of Questions
 - Face-to-Face Conversations
 - Addressing a Large Audience
- 9.4. Get Organised
 - Productivity
 - Habits
 - Discipline
- 9.5. Develop Leadership Attributes
 - Seek Out a Mentor
 - Recognise Your Own Weaknesses
 - Trust
- 9.6. Look after Yourself
- 9.7. Be Comfortable with Uncertainty
- 9.8. A Final Word
